New Board Adopted Bocce Court Rules

Check out your palm trees!

There have been several Queen Palms in the community showing evidence of Fusarium Wilt Disease recently. Please keep an eye on your Queen Palms and if you notice brown fronds that are hanging down and looking straggly and wilted, please contact your landscaper immediately to have him/her tell you if the tree is diseased. If it is, the tree has to be removed immediately. Be sure to have the tree stump ground also.

This disease is very contagious and spreads quickly. You do not need to wait for permission from ARC to have these diseased trees cut down. Please just let ARC know you have removed a diseased tree so we can keep track of where the trees are.

If you have any questions, you may contact Paul in the office or Barbara Waldman, ARC Chair

Our ground Water

Irrigation is becoming quite a serious issue in the community! Please check your system to make sure you are watering on the proper days. As a reminder the pumps are on for extended times until 10 am on Wednesdays and Thursdays specifically for irrigation checks. Make sure your irrigation company is aware of these times.

Currently we have the privilege of watering twice per week. Odd number addresses may water one time on Wednesday and one time on Saturday. Even number addresses may water one time on Thursday and one time on Sunday.

IF the community continues to utilize excessive water, we will be limited to watering one time per week. Please also share this information with your neighbors
